Order information

Dexter

AUSTRO FLAMM

① **Dexter basic unit: door hinge LEFT or RIGHT**

- The basic unit Dexter LEFT or RIGHT is prepared for flue gas outlet top or back ; for the flue gas connection in the back a cover plate for the top flue gas outlet is always delivered with the basic unit; this part also fits in the top outlet on the additional top extension boxes
- Separate air inlet to the bottom is prepared on all Dexter basic units; for separate air inlet from the back an additional pedestal box order is necessary (closed side to the front)

Dexter L (door hinge LEFT)	Dexter R (door hinge RIGHT)
ø 150	

Accessory:

② 072002-29 pedestal box (separate air inlet holes prepared) The basic unit is placed on top of the pedestal box. There is more than one pedestal box possible; for a separate air outlet to the back turn the closed side to the front	
③ 072003-29 side box with pins The side boxes with pins are stackable; a side box shall not be used to be the only or the last box of the stack; in this last case you need a side box with a closed top end and no pins (072006-29)	
④ 072006-29 side box top end with closed top and without pins; it is to be used either as the only or the last box of a stack of side boxes	
⑤ 072004-29 top extension box with flue gas outlet top; incl. cut out for rear flue gas outlet; the top extension boxes are stackable on the basic unit; cover plate for the top flue exit from the basic unit can be used to close the top outlet on the last extension box	
⑤ a) 072007-29 top extension box with flue gas outlet to the LEFT	
⑤ b) 072008-29 top extension box with flue gas outlet to the RIGHT	
⑥ 072005 HMS: one top extension box is mandatory; max. two top boxes with HMS allowed; flue gas pipe has to be led through the box with HMS to ensure proper heat storage	
⑦ 620253-29 elbow pipe 90° for top extension box	230 50 188 ø149 ø154
